- Each group of learners divides itself into smaller groups of the number of points that make the shape e.g., the triangle group can be 3 smaller groups, rectangle

group can be in 4 smaller groups while the circle group can be as many as possible for as long as they form a circle.

- The starting point can have various materials that can be considered as litter (plastic bags, plastic bottles, paper, containers for food, cans) and need to be disposed of.
- Learners one point near the bunch of litter pick one piece and assign one person to take it to the next point around the shape and relay it.
- The group that receives it, pick a person to relay to the next group until the last group picks a person who will take the picked litter to the designated place.
- Rotation takes place; the last group together with one who relayed the litter move to the first, while the first move to the second and so on.
