PREFACE

The **Creative and Technology Studies Teaching Module** for **Grade 1** has been developed in response to the introduction of the **Competence-Based Curriculum** (CBC), a transformative initiative aimed at enhancing education quality and relevance.

This teaching module is designed to support teachers in effectively delivering Creative and Technology Studies lessons under the new curriculum. Its primary objectives are to; bridge the gap created by the absence of approved textbooks and equip teachers with practical skills and assessments tailored to learners' needs and levels

As the Ministry of Education, we acknowledge the challenges associated with transitioning to a new curriculum. Consequently, this module reflects our commitment to providing teachers with structured guidance, suggested activities, and formative and summative assessments aligned with the CBC's objectives.

While this module serves as a foundational resource, we encourage teachers to supplement it with their own research and innovations to address potential gaps during implementation. The suggested activities and assessments are designed to foster practical and critical thinking skills in learners, ensuring relevance and adaptability across diverse school contexts.

Teachers are encouraged to tailor these suggestions to their unique classroom dynamics and explore alternative approaches when necessary. We hope this module will empower teachers to navigate the new competence-based curriculum with confidence, inspiring and equipping learners with essential competencies, knowledge, skills, and attitudes.

Kelvin Mambwe (PhD)
Permanent Secretary- Educational Services
MINISTRY OF EDUCATION

ACKNOWLEDGEMENT

The **Creative and Technology Studies Teaching Module** for **Grade 1** is the culmination of a collaborative and inclusive development process. Sincere appreciation is extended to the numerous individuals, institutions, and organizations that contributed to the module's creation.

I am grateful for the financial and technical support provided by teachers, Lecturers from Colleges of Education and Universities, Subject Associations, Civil Society Organizations and Cooperating Partners. Their invaluable input and expertise have enriched the content and quality of this teaching module.

I also acknowledge the dedication and hard work of the staff at the Curriculum Development Centre, whose tireless efforts ensured the successful completion of the module.

Charles Ndakala (Dr.)
Director - Curriculum Development
MINISTRY OF EDUCATION

MODULE ICONS:

 Terminology	 Assessment	 Tips
 Activity	 Summary	 Discussion

INTRODUCTION

The Competence-Based Curriculum (CBC) is designed to equip learners with competences necessary to navigate the complexities of the modern world. This Creative and Technology Studies(CTS) teaching module is tailored to support teachers in implementing the CBC, focusing on the attainment of specific competences of specified sub-topics as indicated in the syllabus, but aligned to the general competences like creativity and innovation, critical thinking, problem-solving, and effective communication.

Each specific competence is supported by carefully designed learning activities that cater for diverse learning styles and abilities. These learning activities further give guidance on how they should be effectively administered to the learners to meet the expected standards that speak to the specific competences. Furthermore, this module encourages teachers to assess learner progress using a range of strategies.

By using this CTS teaching module, teachers will be able to support learners to acquire competences outlined in the syllabus. This, in turn, learners will develop practical skills and enhancement of talents, creativity, self-expression and sense of aesthetics.

TOPIC: 1.6 SOUNDS

INTRODUCTION:

This topic introduces learners to the world of sounds through listening, identifying, and creating them. Sounds are part of our everyday life, and they can be natural (like birds singing or wind blowing) or artificial (like car horns or bells). Learners will explore and experiment with different sources of sound to develop listening, creativity, and expression skills.

General Competence (s):

Learners should acquire the following General Competence(s):

- **Critical Thinking:** Make simple logical conclusions.
- **Creativity and Innovation:** Use imagination and creativity to solve problems.

Hook:

Ask learners: “What sounds can you hear right now in the classroom or outside?” Let them mention and mimic what they hear.

KEY TERMS:

- **Sound:** A form of energy produced by vibrating objects.
- **Explore:** To investigate or discover something new.
- **Natural Sounds:** Sounds from nature like animals, wind, or rain.
- **Artificial Sounds:** Man-made sounds like machines, bells, or cars.

Sub-Topic: 1.6.1 Exploration of Sounds

Introduction:

Exploring sounds means discovering and learning how different sounds are made, what causes them, and how they can be used to express ideas. It helps children sharpen their listening skills and encourages creative thinking.

Specific Competence:

1.6.1.1 Produce different sounds

Learning environment: Indoor or Outdoor (Natural/Artificial/Technological)

Suggested teaching and learning materials:

- Plastic bottles, tins, sticks, stones
- Flashcards of sound sources
- Drums or other local instruments
- Drawing paper and crayons

LEARNING ACTIVITIES

ACTIVITY 1: Producing different Sounds (Clapping, hissing, whistling...)

Task 1 – Sound Scavenger Hunt

- Learners to listen to the sounds around them.
- Learners to identify the sounds they heard and try to imitate each sound.

TIP:

Engage learners in differentiating natural from artificial sound.

Task 2 – Sound Creation

- Each group to use items (sticks, bottles...) or their bodies (clapping, whistling...) to produce a unique sound.

TIP:

- Divide learners into small groups.
- Allow presentations from each group to showcase their new sounds.
- Write down all the sounds and their sources on the board.

Expected Standard: Different sounds produced accordingly.

ASSESSMENT CRITERIA

- Observe whether learners are actively creating and imitating sounds (clapping, tapping, hissing...).
- Assess the Ability to **imitate and express** sounds through voice or body.
- Assess the Ability to **listen attentively** and **observe surroundings** to identify various sounds.
- Assess the ability to use body parts (hands, mouth, fingers) to produce different sounds.

SUMMARY

Sound is created by vibration and can be found everywhere around us. By exploring and experimenting with sounds, learners develop creativity, listening skills, and the ability to express themselves. They also learn to distinguish between natural and artificial sounds, making the learning process interactive and fun.

TOPIC: 1.7 DRAMA

INTRODUCTION

Drama is a fun and creative way of telling stories by acting, talking, and using movement. It helps learners to express emotions, solve problems, and understand different ideas through play. Drama activities can help learners become more confident, imaginative, and better at working with others.

General Competence(s)

Learners should acquire the following General Competence(s):

- **Critical Thinking** : Solve basic problems logically.
- **Creativity and Innovation** : Use imagination and creativity to solve problems.
- **Collaboration** : Participate in and express themselves through creative arts.
- **Emotional Intelligence** : Show sympathy and empathy.
Recognise personal emotions and that of others.
Communicate with others.

Hook:

Say to learners:

“Today, you get to become actors! Imagine you are the teacher, your friend is a doctor, and someone else is a shopkeeper. How would you act? Let’s have fun pretending to be different people!”

KEY TERMS:

- **Drama:** A way of telling stories using acting, talking, and movement.
- **Role Playing:** Pretending to be someone else in a fun and playful way to learn and understand their actions or feelings.

Sub-Topic: 1.7.1 Practicing Simple Plays

Introduction

Drama allows learners to express themselves by pretending to be other people or things. It helps learners use their imagination and builds their communication and problem-solving skills. There are many kinds of drama, like funny plays (comedies) and serious plays (tragedies).

Specific Competence:

1.7.1.1 Practice simple plays.

Learning environment: Indoor or Outdoor (Natural/Artificial/Technological)

Suggested Teaching and Learning Materials:

- Charts with roles (teacher, doctor, shopkeeper, etc.)
- Simple costumes or props (scarves, hats, chalk, toy stethoscope)
- Picture charts showing people doing different jobs
- Space for group performances

LEARNING ACTIVITY

ACTIVITY 1: Role playing given themes (washing cars selling artifacts...)

Task 1 – Role playing

learners take turns acting as other people like a doctor, parent, or shopkeeper.

TIP:

- Divide learners into small groups.
- Give each group a different theme to act out (a market scene, classroom, a family dinner, hospital visit...).
- Let them practice with your help, using simple props and imagination.
- At the end, each group performs their drama in front of the class.

Expected Standard: Simple plays practiced accordingly.

ASSESSMENT CRITERIA:

- Assess the use of appropriate **vocabulary** and tone during role play.
- Assess the ability to demonstrate **creative thinking** when acting out a theme or scene.
- Assess willing to express **feelings and emotions** through drama.
- Learner applies understanding of **daily life experiences** in dramatizing real-life situations.
- Assess **coordination** and **spatial awareness** during performance.

SUMMARY

Drama is a fun way to **tell stories, solve problems, and express feelings**. By acting like different people, learners learn how others feel and think.

TOPIC: 1.8 HOSPITALITY

INTRODUCTION

Hospitality means being kind, helpful and welcoming to visitors or guests. When we practice customer service skills, we make people feel happy and welcome. This is important in places like homes, schools, restaurants, and hotels.

General Competence(s)

Learners should: Acquire the following General Competence(s):

- **Emotional Intelligence** : handle guests appropriately
- **Communication** : Use appropriate language (verbal and non-verbal) in different situations.
- **Digital Literacy** : Write, read and send text messages.
Make and answer a phone call.

Hook:

Say to learners *“Imagine you are visiting a friend’s house. How would you feel if they greeted you with a smile and made you feel happy? And how about if their house was nice and clean? You would probably feel really good, right? Today, we will learn how to be kind and helpful to guests and how to keep rooms clean and tidy so everyone feels happy and comfortable!”*

KEY TERMS:

- **Friendly** : Being kind and nice to people.
- **Welcome** : Receiving and greeting people with a smile and kind words.
- **Helpful** : Assisting others when they need something.
- **Guest** : A person who visits.
- **Polite** : showing good manners, respect and consideration towards others.
- **Customer** : A guest who uses a service such as (staying at a hotel, eating at a restaurant...)
- **Customer service:** Support and help provided by a company or organization to its customers before, during and after a purchase or interaction.

Sub Topic: 1.8.1 Customer Service

Introduction

Customer service is the support and assistance provided to customers by a business or organization before, during and after the purchase or interaction. It involves understanding customer needs, resolving issues, and providing solutions to ensure customer satisfaction and loyalty.

Specific Competence: 1.8.1.1

Perform customer service skills

Learning environment: Indoor or Outdoor (Natural/Artificial/Technological)

Suggested teaching and learning materials:

- Flashcards with greetings and polite words.
- Toy phone for role-playing.
- Picture charts showing friendly and helpful behaviors.

LEARNING ACTIVITY

ACTIVITY 1: Performing customer service skills (*being friendly, welcoming, being helpful to Guests, responding and answering to phone calls...*)

Task 1: Being Friendly and Welcoming

- Learners to practice greeting each other in pairs through a song (how are you my partner...)
- Learners to show other ways of greeting (Hand shake, hugging...).
- Learners to role-play: (welcoming a new learner, helping a friend locates a tuck-shop, inviting a new friend to play...)

TIP:

- Teacher provides feedback on the proper way of greeting and welcoming.

Task 2: Answering phone calls politely

- Learners to practice in pairs using a toy phone.

TIP:

- Teacher provides feedback on voice tone and politeness.
- Teacher explains how to answer a phone call politely:
 - “Hello, good morning! How can I help you?”
 - “Please hold on, I will get someone to assist you.”
 - “Thank you for calling! Have a nice day.”

Expected Standards: Customer service skills performed confidently.

ASSESSMENT CRITERIA

1. Oral questioning: “How do you welcome a guest?”
2. Practical activity: Learners perform greeting and helping tasks.
3. Teacher observes and gives feedback on politeness and confidence.
4. Assess:
 - Ability to speak clearly and effectively while greeting and welcoming others.
 - Ability to answer the phone politely and respond appropriately in a conversation.
5. Assess on the understanding and application of polite greetings and response
6. Home task: Ask learners to greet and welcome their family members at home.
 - Practice answering a toy phone politely.
 - Share their experiences from home in the next lesson.

SUMMARY

Customer service involves being kind, helpful, and respectful to others. It is demonstrated through warm greetings, friendly smiles, and making guests feel welcome. Key skills also include using polite language and handling phone respectfully.

Sub Topic: 1.8.2 Cleaning

Introduction

Cleaning is important to keep our rooms neat and safe. We use different items like brooms, cloths, and detergents to remove dirt and make rooms look nice.

Specific Competence: 1.8.2.1 Clean Rooms Using Different Items

Suggested teaching and learning materials:

- Real cleaning items (broom, cloth, detergent, dustpan, water).
- Flashcards with cleaning items.
- A small space or room for practical cleaning.

ACTIVITY

ACTIVITY 1: Cleaning rooms using different items (*Brooms, pieces of cloth, detergents ...*)

Task1: Identifying Cleaning Items.

- Learners name cleaning items and describe their use.

TIP:

- Teacher shows real cleaning items (broom, cloth, detergent, water, dustpan).
- Charts with pictures of cleaning items are displayed.

Task 2: Practicing cleaning with different items

- Learners take turns sweeping, wiping, and using detergent.
- Learners to clean different areas like the table, floor, and chair.

Task 3: Keeping Rooms Clean and Tidy

- Learners pick up litter and dispose of it correctly.
- Learners arrange furniture neatly after cleaning.

TIP:

- Teacher observes and probe learners during the activities.
- Teacher gives feedback and corrects mistakes.

Expected Standard: Rooms cleaned using different items correctly

ASSESSMENT CRITERIA

- Assess understanding and knowledge of various cleaning tools and their uses.
- Assess application of correct cleaning techniques using different tools (broom, mop, dustpan, cloth...).
- Ability to demonstrate use of cleaning tools effectively and safely.
- Home Activity:
 - Ask learners to help clean their rooms at home.
 - Share what they used and how they cleaned in the next lesson.

SUMMARY

Cleaning helps keep rooms neat, safe, and healthy. It involves using tools such as brooms, cloths, detergents, and dustpans to remove dirt. Sweeping, wiping, and washing help make spaces look clean, tidy, and pleasant.

TOPIC: 1.9 ICT DEVICES IN EVERYDAY LIFE

INTRODUCTION

In this topic, learners will be introduced to basic ICT devices that they encounter in real life situations. They will learn to identify, use, and handle devices such as desktop computers, laptops, smart phones, televisions, and radios. This topic helps learners develop familiarity with technology, enhances their curiosity, and builds foundational digital literacy skills.

General Competence(s):

Learners should acquire the following General Competence(s):

- **Digital literacy** :
 - Use a computer or digital device basics with less difficulty.
 - Write, read, and send text messages.
 - Make and answer a phone call.
- **Communication** : Express oneself using different media and symbols.
- **Critical thinking** :
 - Organize things according to their attributes.
 - Manipulate different objects.

Hook:

Show learners real or pictures of samples of different ICT devices (Smart phone, TV, Computer...). Ask learners if they have seen or used any of such devices.

KEY TERMS:

- **ICT Devices:** Machines used for communication, entertainment, and work (computers, smartphones, televisions, and radios...).
- **Desktop:** A large computer placed on a table, used for work and study.
- **Laptop:** A portable computer that can be used anywhere.
- **Smartphone:** Small computers that fit in your hand and can make calls, take pictures, and browse the internet.
- **Printer:** A machine that prints words and pictures onto paper.
- **Television:** A screen used to watch videos and shows.
- **Radio:** A device used to listen to music, news, and other programs.

SUB-TOPIC 1.9.1 I CT Devices

Introduction

This subtopic introduces learners to the different ICT devices commonly found at home and school. Understanding these devices will help them become familiar with technology and its uses in real life situations.

Specific Competence(s):

1.9.1.1 Use ICT Devices

Learning Environment: Indoor or Outdoor (Natural/Artificial/Technological)

Suggested Teaching and Learning Materials:

- Real ICT devices (if available).
- Flashcards with pictures of ICT devices.
- Cut-out images for matching activities.
- Toy phones, keyboards, or other ICT tools.
- Educational videos on ICT devices.
- Storybooks or posters related to ICT devices.

LEARNING ACTIVITIES:

ACTIVITY 1: Identifying ICT devices

Task 1: Introduce the Activity

Learners to explore **real ICT devices or picture** of ICT devices such as (a desktop, laptop, smart phone, television, radio, printer...)

Task 2: Marching ICT Devices with their names

Learners to match ICT devices with their correct names. (If possible, use **toy versions or real objects** for hands-on learning).

ACTIVITY 2: Switching on/off of ICT devices

Task 1: Demonstrate How to Turn Devices On/off

- Learners to demonstrate switching on/off of ICT devices.
- Let learners take turns pressing the button on a device with supervision.

TIP:

Teacher to emphasize the reason for turning off ICT devices;

- **Saves Battery:** Devices lose power if not turned off correctly.
- **Prevents Damage:** Turning off properly helps devices work well.
- **Saves Electricity:** Turning off unused devices helps the planet.

ACTIVITY 3: Using digital devices Sending/receiving phone calls, capturing photos

TASK 1: learners to role play

- Making an audio Call, Video calling... (Learners can wave and pretend to see a friend on a video call).

EXPECTED STANDARD: ICT devices used correctly.

ASSESSMENT CRITERIA:

- Assess the ability to identify and name different ICT devices (desktop, laptop, smartphone, television, printer...).
- Assess the ability to operate ICT devices, specifically turning them on and off correctly.
- Assess the ability to apply their understanding of ICT devices to complete tasks, such as switching devices on/off and simulating digital communication scenarios.

SUMMARY

ICT devices are fun and helpful tools that can make learning and communication more exciting. They are like magic windows to a world of knowledge.

TOPIC: 1.10 COMPUTER SOFTWARE

INTRODUCTION

In this topic, learners will be introduced to basic computer software concepts through interactive educational games. They will explore how games can be used as learning tools to enhance problem-solving, creativity, and digital literacy. By engaging with computer educational games, learners will develop hand-eye coordination, critical thinking, and decision-making skills.

General Competence(s)

Learners should acquire the following General Competence(s):

- **Digital literacy:** - Use a computer or digital device basics with less difficulty.
- **Communication:** - Express oneself using different media and symbols.
- **Critical thinking:** - Organise things according to their attributes.
- Manipulate different objects.

KEY TERMS:

- **Computer Software:** Special programs on a computer that help us do things like play games, write stories, or search for information.
- **Educational Game:** A fun game on the computer or tablet that helps us learn new things, like math or reading.
- **Application (App):** A program on a phone or computer that helps us do specific things, like taking pictures or playing music.
- **Mouse and Keyboard:** Things we use to control the computer. The mouse moves the pointer, and the keyboard helps us type words.
- **Touch screen:** A screen that lets us touch it with our fingers to do things, like tap on pictures or scroll through pages.

Sub-Topic 1.10.1 Computer Educational Games

Introduction

This subtopic introduces learners to computer educational games, teaching them how to play simple games that develop their problem-solving and cognitive skills.

Specific Competence(s): 1.10.1.1 Play computer educational games

Learning environment: Indoor or Outdoor (Natural/Artificial/Technological)

Suggested Teaching and Learning Materials:

- Computers, tablets, or smartphones
- Age-appropriate educational games.
- Mouse, keyboard, or touchscreen devices.

- Posters or charts on computer software.
- Short video clips on how software works.

LEARNING ACTIVITIES:

ACTIVITY 1: Playing Computer Educational games

Task 1: Demonstrate how to play

- Let learners try simple actions like clicking or tapping to interact to interact with computer games.

Task 2: Let Learners explore the games

- Learners to explore different educational games.

TIP:

Teacher to give the following important reminders for playing games:

- **Follow Instructions** – Listen to what the game says and do what it asks.
- **Use the Mouse, Keyboard, or Touch screen gently** – click, drag, or tap carefully.
- **Take turns** – Share the computer or tablet with friends.
- **Play for a short time** – Stop after a little while and rest our eyes.
- **Ask for help** – If we don't understand, ask the teacher or a friend.

Expected Standard: Computer educational games played correctly.

ASSESSMENT CRITERIA:

- Assess ability to interact with computer games by performing basic actions like clicking, tapping, or using a mouse or touchscreen.
- Assess ability to follow game instructions, listening carefully and performing tasks as directed by the game.
- Assess collaborative behaviour by sharing the computer or tablet with peers and taking turns during game time.

SUMMARY

Computer educational games offer a fun and engaging way to learn. They make learning feel like play while helping learners develop new skills and build confidence in an enjoyable environment.

TOPIC :1.11 HEALTH AND FITNESS MANAGEMENT

INTRODUCTION

This topic helps learners understand the importance of health and fitness for their bodies and minds. Health means being free from illness and feeling well, while fitness is having the strength and energy to carry out daily activities. Through fun physical exercises such as running, jumping, climbing, and stretching, learners will improve their strength, balance, flexibility, and coordination. They will also explore basic gymnastics and movement skills that help them stay active and healthy. These activities not only strengthen the body but also build confidence, creativity, and teamwork. By participating in physical play, learners will develop lifelong habits of staying fit and living a happy, healthy life both at school and at home.

General Competence(s)

Learners should acquire the following general Competence(s):

- **Collaboration:** Participate in and express themselves through creative arts
- **Creativity and Innovation:** Apply a set of skills that are appropriate for the creative process.

Hook:

Begin with “a fun song or chant that includes actions such as running in place, jumping, and stretching. Example: “Head, shoulders, knees, and toes” or “If you’re happy and you know it, jump up high!”

KEY TERMS

- **Fitness** : Being strong, healthy, and able to do physical activities easily.
- **Health** : A state of being well in body and mind, and free from illness.
- **Climbing** : Moving upward using hands and feet, like going up a ladder or tree.
- **Jumping** : Pushing your body off the ground into the air using your legs.
- **Running** : Moving quickly on your feet, faster than walking.
- **Deep breathing:** Slowly taking air in through the nose and out through the mouth to help the body relax.
- **Equipment:** Tools or things used to do a certain activity, like balls, ropes, or mats for exercise.

Sub-Topic: 1.11.1 Fitness and Health

Introduction

Fitness and health are important for keeping our bodies strong and active. In this lesson, learners will enjoy different movements such as running, jumping, climbing, and deep breathing to help improve their physical strength and overall health. Learners will also learn how to use simple playground and indoor equipment safely.

Specific Competence(s) 1.11.1.1 Perform fitness and health activities

Learning Environment: Indoor and Outdoor (Natural/Artificial/Technological)

Suggested teaching and learning materials

- Online videos.
- Posters /pictures/ magazines, charts.
- Cones, Skipping ropes, Bars, Ladders, Sliders, Staircases.
- Open space (gym, playground, or classroom floor).
- Soft mats or towels for comfort.
- Visual aids (posters showing simple exercises like jumping jacks, stretches, etc.).
- Music (optional for fun movement).

LEARNING ACTIVITIES:

Task 1: Warm-up activity, Learner to perform:

- Marching in place.
- Arm swings.
- Deep breathing exercises.

Task 2: Main Activities:

- **Running relay:** Learners run from one cone to another and return.
- **Jumping line game:** Jump back and forth over a rope or line on the ground.
- **Climbing and crawling:** Learners climb ladders or stairs and crawl under a rope.
- **Slider activity:** Learners slide down gently and land on a mat.
- **Breathing practice:** Learners stand, close their eyes, breathe in deeply through the nose and out through the mouth.

Task 3: Cool-down activities, learners to:

- Slow walking
- Gentle stretching
- Final deep breathing

TIP:

- Keep activities short and fun to maintain attention.
- Always model each activity and guide learners through safe usage of equipment.
- Encourage all learners, even if they are slow or shy.

Expected Standard: Fitness and health activities performed appropriately.

ASSESSMENT CRITERIA

- Assess demonstration of basic motor skills such as running, jumping, climbing, crawling, and sliding in a controlled manner.
- Assess ability to perform deep breathing exercises as part of the warm-up, main activities, and cool-down sessions.
- Assess awareness of safe practices during physical activities by following instructions and using equipment appropriately, especially during activities like climbing and sliding.
- Assess cooperation and teamwork during group activities such as the running relay, learning to work together and take turns.

SUMMARY

This topic is key in helping learners take part in fun physical activities that improve their body strength, movement, and health through practicing jumping, running, climbing, and deep breathing while using ropes, ladders, and other equipment. These activities help their muscles grow and teach them to stay active and healthy.

Sub-Topic: 1.11.2 Educational Gymnastics

Introduction:

Gymnastics is a fun way to make our bodies strong and flexible. Learners will perform simple tumbling activities such as forward rolls and frog jumps, as well as stunt movements like squatting, balancing, and arm and leg rolling. These activities improve coordination and help learners become more aware of how their bodies move.

Specific Competence(S):

1.11.2.1 perform tumbling and stunts

Learning environment: Indoor and Outdoor (Natural/Artificial/Technological)

Teaching and Learning Materials:

- Floor mats or soft ground
- Cones or chalk to mark positions
- Small balance beams (low and safe)
- Pictures or flashcards showing movements
- Music (optional, for rhythm and fun)

LEARNING ACTIVITIES

ACTIVITY 1: Performing simple tumbling activities (*forward roll, cartwheel, frog jump...*)

Task 1: Warm-up activities; learners to perform:

- Stretching arms, legs, back
- Marching in place
- Deep breathing

Task 2: Tumbling Activities; learners to perform:

- **Forward roll** (on a mat): Demonstrate and assist learners in rolling forward.
- **Frog jumps**: Squat and jump forward like a frog across the mat.
- **Cartwheel (optional)**: Simple two-hand side roll for those ready. Use teacher support or pair learners.

Task 3: Stunt Activities; learners to perform:

- **Arm rolls**: Circle arms in large movements.
- **Leg rolls**: Sitting down and rolling legs back and forth.
- **Squatting**: Practice squat and stand several times.
- **Balancing**: Stand on one foot for 5–10 seconds. Use arms to balance. Try balancing on a small beam or line on the ground.

Task 4: Cool-down activities

- Gentle stretching
- Slow breathing
- Sitting quietly and discussing favorite movements

TIP:

- Demonstrate each movement slowly and clearly.
- Always supervise closely during rolling or balancing activities.
- Praise effort, not perfection. Modify activities for learners who need extra support.

Expected Standard: Tumbling activities performed appropriately.

ASSESSMENT CRITERIA

- Assess the ability to:
 - perform tumbling activities (frog jump, forward roll...).
 - demonstrate stunt activities (squatting, arm rolling, balancing...).
 - follow safety rules and participate confidently.
- Assess understanding of different tumbling activities and stunts.

SUMMARY

This topic is key in helping learners explore educational gymnastics through tumbling and stunt activities by practicing movements that help build body strength, flexibility, and balance. Also by learning how to roll, jump, and balance safely.

TOPIC:1.12 TOURISM

INTRODUCTION

In this topic focuses on tourism and its impact on communities. Learners will explore the concept of tourism, how people travel to visit exciting places, and the role of tourists in supporting local economies. This topic will help learners to learn about different cultures, landmarks, and the importance of tourism in bringing people together. This knowledge will also help learners understand how tourism contributes to the appreciation of diverse cultures and the discovery of new places, making the world more interesting and connected.

General Competence (s)

Learners should: Acquire the following General Competence(s):

- **Citizenship:** - Appreciate and respect different cultures and landmarks in their immediate environment.
- **Emotional Intelligence:** - Develop curiosity and awareness of cultural diversity.
- **Problem solving:** - Learn to locate landmarks using cardinal points.
- **Communication:** - Use appropriate language (verbal and non-verbal) in different situations.
- Express oneself using different media and symbols.

Hook:

- *Display images or videos of different cultural practices and landmarks.*
- *Sing a song or recite a poem about different cultures. or*
- *Use a simple game where learners give directions to common landmarks.*

KEY TERMS:

- **Tourism** : Traveling to different places for fun, learning, or adventure.
- **Tourist** : A person who travels to visit new places.
- **Culture** : The way people live, including their food, clothes, and language.
- **Tradition:** Special things people do in their culture, like celebrations and festivals.
- **Landmark:** A special place or building that helps people know where they are, like a school, Church, hospital, famous statue or a big tree.
- **Custom** : A way of doing things in a community, like greetings or how people eat.
- **Heritage** : Important things passed down from parents and grandparents, like stories, dances, and old buildings.
- **Cardinal points (North, South, East, West):** The four main directions used to find places on a map.

SUB-TOPIC: 1.12.1 Cultures and Landmarks**Introduction**

Cultures are ways of life of different groups of people. People have different traditions, clothing, food, language and dances that make them unique. Learning about different cultures helps us appreciate and respect others. Additionally, landmarks are important places in a community, such as markets, hospitals, and police stations. Knowing how to locate them using cardinal points helps us find our way.

Specific Competences:**1.12.1.1 Explore different cultures in the immediate environment.**

Learning environment: Indoor and Outdoor (Natural/Artificial/Technological)

Teaching and Learning Materials:

- Flashcards.
- Local newspapers or printed images.
- Real cultural items (if available).
- Local folk tale books.
- Audio clips or simple dramatizations.
- Traditional clothes, hats, beads (real or toy versions).
- Simple musical instruments.
- Cultural posters or drawings.

**LEARNING ACTIVITIES:****ACTIVITY 1: Identifying Different Cultures**

Task 1: Learners recognize different cultural groups in their area.

- **Name and Match Game:** Learners match cultural names (written or said aloud) to pictures.

**TIP:**

- **Picture Talk:** Show pictures of people in different traditional attire from the local area (Namwanga, Tumbuka, lenje, Ngoni...).

**Group Discussion**

Ask learners:

- “What do you notice in these pictures?”

- “Do you know someone who wears clothes like this?”
- Show pictures of people in different traditional clothes or eating different foods.

ACTIVITY 2: Telling Stories about Different Cultures

- Learners listen to or retell simple stories from different cultural groups.

TIP:

- **Story telling Circle:** Sit in a circle and tell a short cultural story (folk tales).
- **Guest Speaker (optional):** Invite a parent or elder to share a short cultural tale or song.
- **Story Retell Activity:** Ask questions like:
 - “Who was in the story?”
 - “What happened at the end?”
 - “What did we learn from the story?”

ACTIVITY 3: Exploring Different Cultures

Learners experience culture through **visuals, music, clothing, or customs**.

Task 1: Dressing Up Activity: learners try on (dress) traditional clothes.

Task 2: Music and Dance: listen to songs and perform simple dance moves or clapping games.

Task 3: Food Talk: learners to identify different traditional foods from pictures or video clip shown.

Task 4: Craft or Drawing Activity: learners to draw a picture of someone in traditional attire or performing a cultural dance.

TIP:

- **Dressing Up Activity:** Bring traditional clothes (or pictures). Let learners try on or pretend to dress in them.
- **Music and Dance:** Play traditional songs and let learners do simple dance moves or clapping games.
- **Food Talk:** Show pictures of different traditional dishes. Ask:
 - “Who has eaten nshima with kapenta?”
 - “Which tribe eats ifinkubala (caterpillars)?”
- **Craft or Drawing Activity:** Let learners draw a picture of someone in traditional attire or performing a cultural dance.

Expected Standard: Different cultures and landmarks explored accordingly.

ASSESSMENT CRITERIA:

- Assess understanding of the **diversity of cultures** in their community by recognizing and naming different cultural groups.
- Assess ability to appreciate **different cultural practices**, such as clothing, food, and traditions, fostering **respect for diversity**.
- Assess application of **critical thinking** during group discussions, formulating questions and responses related to what they notice about cultural differences and similarities.
- Assess ability to **comprehend** cultural stories and make connections with their own lives.
- Assess ability to showcase their **memory skills** by recalling specific details about the cultural stories they hear and relating them to their own experiences.

Specific Competence:

1.12.1.2 Locate landmarks using cardinal points

Learning environment: Indoor and Outdoor (Natural/Artificial/Technological)

Teaching and Learning Materials:

- Large **floor map** or classroom-drawn map (with a school at the center).
- **Flashcards or cut-outs** of landmarks (market, hospital, police station, curio shop...).
- **Compass rose** (drawn or printed).
- Labels for North, South, East, West stuck on classroom walls.
- Mini landmark figures (optional, for group activity).
- Chalkboard or chart paper.

LEARNING ACTIVITIES:

ACTIVITY 1: Identifying Different Landmarks

Task 1:

- Learners to take a short walk with the teacher or use a map to identify nearby landmarks.
- Learners to identify “*special places they have in their town or village?*”
- learners to describe what happens at each place.

TIP:

- Begin by taking a short walk with learners or use a map to identify nearby landmarks.
- Ask learners a simple question: “*What special places do we have in our town or village?*”
- Show pictures of common landmarks (a school, hospital, bridge, market, church, or

famous statue...).

- Explain that **landmarks** are important places people visit or use to find their way.

Task 2: Play a picture matching Game

- Learners to name the places and say what happens there (*"This is a school. We learn here."*).
- Learners to draw a landmark they know.

TIPS:

- **Picture Matching Game**

- Show pictures of different landmarks.
- Ask learners to name the places and say what happens there (*"This is a school. We learn here."*).
- If available, use a local map or draw simple images of familiar landmarks.
- Ask learners:
 - *"Which landmarks do you see on your way to school?"*
 - *"Which places do people visit often?"*

- Write their answers on the board.

- **Drawing Activity**

- Ask learners to draw a landmark they know.
 - Let them share their drawings with the class and explain what the place is used for.
- End with a short song or clapping game about places in the community.

LEARNING ACTIVITIES:

ACTIVITY 2: Locating Landmarks Using Cardinal Points

Task 1: Demonstration with a Classroom Compass

- Learners Stand in the middle of a well labelled classroom and point out the four directions as *North, South, East, and West*.
- Learners to move or point in the correct direction.

TIP:

- Label the classroom walls as North, South, East, and West.
- Have learners stand and point to each direction.

Task 2: Locating Landmarks

- If possible, learners go outside and relate directions to real places (*The playground is to the East, Toilet is in the west...*).
- Learners to move or point in the correct direction.
- Learners to Sing a simple **North, South, East, West** song or do a fun movement activity.

**TIP:**

- Show pictures of familiar landmarks (School, market, hospital...).
- If possible, take them outside and relate directions to real places (*The playground is to the East...*).
- Ask Learners: “*If our school is in the South, where is the market?*”
- Let learners move or point in the correct direction.

Task 3: Drawing Activity: learners to draw a simple map with a school in the center.

**TIP:**

- Give learners a simple map with a school at the center.
- Ask Learners to draw and label a landmark in each direction (North, South, East, West).

Expected Standard: Landmarks located using cardinal points accurately.

**ASSESSMENT CRITERIA:**

- Assess an understanding of their **community** by recognizing important landmarks and places that people visit often.
- Assess the ability to develop **geographical awareness** by recognizing and understanding the significance of places such as schools, hospitals, markets, etc.
- Assess **critical thinking** by categorizing landmarks based on their function (school for learning, market for shopping...).
- Assess the ability to **associate landmarks** with specific activities or purposes in their community.
- Assess the ability to locate landmarks using cardinal points (North, South, East, and West).

**SUMMARY**

Cultures are ways of life of different groups of people. People have different traditions, clothing, food, language, and dances that make them unique. Learning about different cultures helps us appreciate and respect others. Landmarks are important places in a community such as schools, markets, hospitals, and police stations, which learners can recognize and describe. By understanding and using the four cardinal points *North, South, East, and West*, learners develop the ability to locate these landmarks on simple maps or in real-life settings. Cardinal points help us know where places are, enhancing learners’ spatial awareness and understanding of their environment.

TOPIC:1.13 SPORTS SKILLS DEVELOPMENT

INTRODUCTION

Sports Skills Development is all about **learning how to play games and take part in sports activities** that help us become strong, healthy, and active. It also helps learn how to work with others, follow rules, and have fun. Games are fun activities that can be played with friends. Some are traditional games from our culture, while others are modern games like football and netball. Field and track events are sports done in open spaces. These help learners to have strong bodies by running, jumping, and throwing.

General Competence(s)

Learners should: Acquire the following General Competence(s)

- **Creativity and innovation:**
 - Apply a set of skills that are appropriate for the creative process.
- **Emotional Intelligence:**
 - Recognise personal emotions and that of others
- **Collaboration:**
 - Participate in various sports with others
- **Communication:**
 - Use appropriate language (verbal and non-verbal) in different situations.
- **Critical thinking:**
 - Organise things according to their attributes
 - Explore the environment
 - Manipulate different objects

Hook:

Begin with an exciting group warm-up (marching, jumping, or clapping in a circle while singing a game song...) and asks: "Who likes playing games? Can you name one game you enjoy with your friends?"

KEY TERMS:

- **Game:** A fun activity with rules played by one or more people.
- **Rules:** Guidelines that show how a game or sport is played.
- **Relay:** A team running race where each person takes turns to run.
- **Sack Race:** A race where you hop in a sack from start to finish.
- **Track:** The place where running races happen.
- **Field Events:** Activities like jumping or throwing done on the field.

Sub-Topic: 1.13.1 Games

Introduction:

Games are activities or contests with rules, often undertaken for entertainment, recreation, or competition. These can be played solo or with others, online or offline, and can take many forms and are played in relation to physical fitness and health of the body of the participant.

Specific Competence:

1.13.1.1 Perform games

Learning environment: Indoor or Outdoor (Natural/Artificial/Technological)

Teaching and Learning Materials:

- Balls, ropes, whistles
- Chalk or cones for marking
- Flashcards with pictures of games
- Open space for playing

LEARNING ACTIVITIES:

ACTIVITY 1: Naming various types of games

Task 1:

- Learners name games they know (tag, hide-and-seek, football, netball, Ichiyenga...).
- Learners practice games in pairs or groups (rotate to ensure everyone participates).

TIP:

- The teacher explains simple rules of selected games.
- Teacher and learners reflect on how they played and how they followed rules.
- Use more traditional games that are culturally relevant and easy to play with simple equipment. Modify games to ensure safety and inclusion.

ACTIVITY 2: Performing various games (*Modified conventional and traditional games*)

Task 1: Warm-Up Activities

- Learner to make simple movements like:
- Jumping on the spot
- Clapping and marching
- Stretching arms and legs

TASK 2: Game Demonstration

- Game 1: Traditional games – Ichiyenga (or any local game) – Learn to play in small groups.
- Game 2: Modified conventional games – Netball (Throw and Catch)

Note: *modify the games to suit the age group*

TIP:

- Briefly explain the game and rules.
 - Use learners to demonstrate.
 - Use a soft ball.
 - Learners pass and catch without moving.
 - No scoring – focus on teamwork.

Expected Standard: Games performed appropriately.

ASSESSMENT CRITERIA:

- Assess **knowledge and understanding of various games** by naming familiar games, including both traditional and conventional ones (tag, hide-and-seek, football, Ichiyenga, ciyato, isololo...)
- Assess ability to practice **basic physical movements** and improve their motor skills through game participation
- Assess an **understanding of game rules** by following the instructions and rules of each game they play, such as passing and catching in netball without moving
- Assess the ability to engage with **culturally relevant traditional games** (e.g., Ichiyenga) and develop an understanding of cultural heritage and practices through play.

SUMMARY

Games being the activities or contests with rules, often undertaken for entertainment, recreation, or competition, are therefore, important in the life of a learner as they give the hands-on practical knowledge acquisition as well as skills development which will remain in a learner the entire life.

Sub Topic: 1.13.2 Field and Track Events

Introduction

Field and track events are athletic competitions that take place on a running track or a field, testing athletes' speed, strength, endurance, and agility. Field activities include jumping, throwing and vaults while Track events includes sprint races, middle-distance races, hurdles and relays.

Specific Competence(s):

1.13.2.1 Perform field and track events

Learning environment: Indoor or Outdoor (Natural/Artificial/Technological)

Teaching and Learning Materials:

- Sacks, batons, cones, measuring tape
- Marked track lines (can use chalk or ropes)
- Stopwatch (optional)
- Pictures or flashcards of different events

LEARNING ACTIVITIES:

ACTIVITY 1: Identifying Events

Task 1: Learners to identify and name Track Events – running races like relays, sprints

Task 2: Learners to identify and name Field Events – jumping or throwing (long jump, ball throw)

TIP:

- Show pictures/videos of long jumpers, high jumpers, or people throwing balls.
- Let learners identify the actions: “Are they running, jumping, or throwing?”
- Group learners to match flashcards of event names to pictures.
- Create a class chart:

Track Events 	Field Events 
Relay Race	Long Jump
Sack Race	Ball Throw

Explain that field events take place on the field and involve jumping or throwing, not running. examples: Long Jump, Ball Throw or Shot Put (use light balls for safety)

ACTIVITY 2: Discussing Simple Rules

- Learners answer the guiding questions like:
 - “What should we do before we run?”
 - “How can we keep safe when jumping?”

TIP:

Teacher to explain the following rules:

- In relay: “Wait for your turn, pass the stick gently.”

- In sack race: “Stay inside the sack, jump to the line.”
- In ball throw: “Don’t step past the line.”

Approach: Keep rules very simple and practical.

ACTIVITY 3: Performing field and track events (relays, 20 meters sack race...)

Task 1: Use open space like a field or playground.

Learners to perform:

- Relay Race (Short distance with baton)
- Sack Race (20 meters)
- Ball Throw or Bean Bag Throw
- Jumping on the spot or Mini long jump

TIP:

- Let learners practice in small groups.
- On the field or open space, demonstrate:
 - How to perform a **standing long jump**
 - How to do a **ball throw** safely (using soft balls)
- Let learners take turns to:
 - Jump from a marked spot and land in sand or on a mat
 - Throw soft balls to see who throws the farthest
- Demonstrate each event first.
- Encourage cheering, teamwork, and taking turns.
- Emphasize **fun, participation**, not winning.

Expected standard: Field and Track Events performed correctly.

ASSESSMENT CRITERIA:

- **Assess the ability to understanding** by identify/mentioning correct activities, their categories as well as demonstrating the correct skills for each given event.
- **Assess the ability to Participate and Involvement** in all events (relay, sack race, ball throw, and jump)
- **Assess the ability to demonstrate skill** - passing a baton in relay, sack race, throw the ball, jump on the spot or forward.

SUMMARY

Field and track events being athletic competitions that take place on a running track or a field that aims at testing athletes’ speed, strength, endurance, and agility are therefore, very important in the learning environment as they equip learners with different athletic skills, and also help them develop strong muscles and bones to withstand pressure and force.

SAMPLE LESSON PLAN

SCHOOL: Lukanga Primary

NAME OF TEACHER: Bwalya Banda Lubasi

DATE: 05/05/2025

CLASS: 1 B

TIME: 07:30 – 08:00

TOTAL ENROLMENT: BOY: 25 GIRLS: 20

DURATION: 30 Min

TOTAL ATTENDANCE: BOYS: 23 GIRLS: 19

SUBJECT: Creative and Technology Studies CTS

TOPIC: 1.6 Sounds

SUB-TOPIC: 1.6.1 Exploration of sounds

GENERAL COMPETENCES:

- i. Critical thinking
- ii. Creativity and innovation

SPECIFIC COMPETENCES: 1.6.1.1 Produce different Sounds

RATIONALE:

This lesson will focus on exploring sounds, particularly discovering and learning how different sounds are made, what causes them, and how they can be used to express ideas. Through brainstorming, exploration, and experimenting, learners will sharpen their listening skills and enhance creative thinking. Lesson 1 of 2

PRIOR KNOWLEDGE:

Learners may have heard and imitated different sounds in their immediate environment.

REFERENCES:

Zambia Primary School Creative and Technology Studies Syllabus, CTS Teacher's Guide. and Learner's Book Grade 1

LEARNING ENVIRONMENT:

- Natural environment (outdoor sounds),
- Artificial environment (classroom, man-made instruments),
- Technological environment (recorded sounds if available)

TEACHING AND LEARNING MATERIALS/RESOURCES:

- Plastic bottles, tins, sticks, stones
- Flashcards of sound sources
- Local instruments (drums, shakers)

EXPECTED STANDARD: Different sounds produced accordingly.

LESSON PROGRESSION:

STAGES	TEACHER'S ACTIVITY	LEARNERS' ACTIVITY	ASSESSMENT CRITERIA
INTRODUCTION 5min	Ask learners “<i>What sounds can you hear right now in the classroom or outside?</i>” or ask learners if they can name any sounds they have heard at home or outside.	Brainstorming and responding with examples (dog barking, car, clapping, wind...).	Observe learner engagement and participation
LESSON DEVELOPMENT 15min	Sound Scavenger Hunt Guide learners outside or near windows to listen to different sounds. Ask them to imitate what they hear.	Activity: Producing different Sounds <i>Task 1: Sound Scavenger Hunt</i> Learners listen to sounds, imitate them, and say whether they are natural or artificial.	Assess the Ability to identify and imitate sounds.
	Sound Creation - Divide learners into small groups. Provide each group with different items (<i>sticks, empty tins and bottle...</i>). - Guide learners to produce unique sounds using items provided and body parts (<i>hands, mouth, fingers</i>) and present to the class. Note: Explain the concept (refer to notes)	Task 2: Sound Creation In groups, learners to create and present their own sounds using materials/items or body parts.	Assess the ability to use items and body parts (<i>hands, mouth, fingers</i>) to produce different sounds.
EXERCISE / APPLICATION 5min	- Call out or make a familiar sound (<i>clapping, hissing, tapping, bird sound...</i>). - Ask each learner to use items and body parts (<i>hands, mouth, or fingers...</i>) to create one unique sound.	- Repeating (imitating) the sound using their voice or body. - Using their hands, mouth, or fingers to create one unique sound. - Playing or making different sounds using classroom materials (<i>tapping a desk, shaking a bottle with stones, or drumming...</i>).	Assess the Ability to produce their own sounds

CONCLUSION 5min	Summarising key learning points: • Sound is created by vibration. • We can hear and make sounds using our body or objects around us. • Sounds can be natural or artificial.	• Listening attentively and ask questions or make comments.	• Evaluate learners' understanding of sounds and their application in real world situations. • Suggest areas of improvement.
---------------------------	--	---	--

HOMEWORK:

- At home, listen to at least three sounds and draw items used to produce that particular sound (bird chirping, someone clapping, a car honking...).

Note: Learners complete the task with help from parents/guardians.

LESSON EVALUATION:

Learners were able to identify, imitate, and create different sounds using available materials and body parts. Participation was active during group presentations. Some learners needed support when differentiating between natural and artificial sounds, which will be reviewed in future lessons.
