VISION

Quality, lifelong education for all which is accessible, inclusive and relevant to individual, national and global needs and value systems.

AUTHORS:

Moonde Osborne	Head of Section-Technology Studies	Chipata College of Education
Kumwenda Andrew	Senior Lecturer	Kasama College of Education
Mumbi Benjamin	Head of Department- Design and Technology	Mpika Boys Secondary School
Mutakela Glenda	Senior Teacher	New Northmead Primary School
MwinsaRoyd	Class Teacher	Nkhanga Primary School

PREFACE

The **Creative and Technology Studies Teaching Module** for **Grade 1** has been developed in response to the introduction of the **Competence-Based Curriculum (CBC)**, a transformative initiative aimed at enhancing education quality and relevance.

This teaching module is designed to support teachers in effectively delivering Creative and Technology Studies lessons under the new curriculum. Its primary objectives are to; bridge the gap created by the absence of approved textbooks and equip teachers with practical skills and assessments tailored to learners' needs and levels

As the Ministry of Education, we acknowledge the challenges associated with transitioning to a new curriculum. Consequently, this module reflects our commitment to providing teachers with structured guidance, suggested activities, and formative and summative assessments aligned with the CBC's objectives.

While this module serves as a foundational resource, we encourage teachers to supplement it with their own research and innovations to address potential gaps during implementation. The suggested activities and assessments are designed to foster practical and critical thinking skills in learners, ensuring relevance and adaptability across diverse school contexts.

Teachers are encouraged to tailor these suggestions to their unique classroom dynamics and explore alternative approaches when necessary. We hope this module will empower teachers to navigate the new competence-based curriculum with confidence, inspiring and equipping learners with essential competencies, knowledge, skills, and attitudes.

Kelvin Mambwe (PhD)
Permanent Secretary- Educational Services
MINISTRY OF EDUCATION

ACKNOWLEDGEMENT

The **Creative and Technology Studies Teaching Module** for **Grade 1** is the culmination of a collaborative and inclusive development process. Sincere appreciation is extended to the numerous individuals, institutions, and organizations that contributed to the teaching development.

I am grateful for the financial and technical support provided by teachers, Lecturers from Colleges of Education and Universities, Subject Associations, Civil Society Organizations and Cooperating Partners. Their invaluable input and expertise have enriched the content and quality of this teaching module.

I also acknowledge the dedication and hard work of the staff at the Curriculum Development Centre, whose tireless efforts ensured the successful completion of the module.

Charles Ndakala (Dr.)
Director - Curriculum Development
MINISTRY OF EDUCATION

MODULE ICONS:

 Terminology	 Assessment	 Tips
 Activity	 Summary	 Discussion

INTRODUCTION

The Competence-Based Curriculum (CBC) is designed to equip learners with competences necessary to navigate the complexities of the modern world. This Creative and Technology Studies(CTS) teaching module is tailored to support teachers in implementing the CBC, focusing on the attainment of specific competences of specified sub-topics as indicated in the syllabus, but aligned to the general competences like creativity and innovation, critical thinking, problem-solving, and effective communication.

Each specific competence is supported by carefully designed learning activities that cater for diverse learning styles and abilities. These learning activities further give guidance on how they should be effectively administered to the learners to meet the expected standards that speak to the specific competences. Furthermore, this module encourages teachers to assess learner progress using a range of strategies.

By using this CTS teaching module, teachers will be able to support learners to acquire competences outlined in the syllabus. This, in turn, learners will develop practical skills and enhancement of talents, creativity, self-expression and sense of aesthetics.

TOPIC:1.14 NEEDLEWORK

INTRODUCTION

This topic, will focus on the art of sewing and the correct use of needlework tools. Learners will explore different sewing tools, their functions, and the importance of handling them safely. It will also help learners learn proper techniques for measuring, marking, and stitching fabric while understanding the significance of tool maintenance and storage. These skills are essential for creating neat and durable fabric items while ensuring personal safety and efficiency in sewing projects.

General Competence(s)

Learners should acquire the following General Competence(s): **Critical Thinking:**

- Create new patterns and shapes
- Organise things according to their attributes
- **Creativity and innovation:** - Apply a set of skills that are appropriate for the creative process.
- Use imagination and creativity to solve problems.
- **Entrepreneurship:** - Understand sources of income
- **Problem Solving:** - Provide solutions to questions and challenging situations

Hook: Show learners real or picture samples of small needlework tools. Ask learners if they have seen or used any of the tools at home.

KEY TERMS:

- **Needlework:** Sewing and making things with a needle and thread.
- **Tailor's chalk:** A special chalk used to draw on fabric before sewing.
- **Tape measure:** A long strip used to measure fabric and body size.
- **Thimble:** A small cap worn on a finger to protect it while sewing.
- **Pin cushion:** A small soft pad used to keep sewing pins safely.
- **Storage:** Keeping things in a safe place when not using them

Sub-Topic: 1.14.1 Needlework Tools

Introduction

Needlework tools help us sew and make small fabric items. Some tools help us measure, others mark fabric, and some protect our fingers while sewing. Learning to use and store these tools properly makes sewing easier and safer.

Specific Competence: 1.14.1.2 Use small needlework tools

Learning environment: Indoor or Outdoor (Natural/Artificial/Technological)

Teaching and learning materials:

- A sewing kit or storage box.
- Small needlework tools (needles, thread, tailor's chalk, tape measure, thimble, pin cushion).
- Picture flashcards of organized and messy sewing kits.
- Labels for storage compartments.
- Needles (with blunt tips for safety).
- Fabric pieces (felt or cotton for easy handling).

LEARNING ACTIVITIES:

ACTIVITY 1: Naming small needle work tools (*tailors chalk, tape measures, thimble...*).

Task 1: Name the Sewing Tools

- Learners to mention the names of real sewing tools given (needle, thread, tailor's chalk, tape measure, thimble, pin cushion...) or large picture flashcards of each tool.

Task 2: Matching Game

- learners pick the correct tool.

Task 3: Picture Colouring

- Learners to colour the pictures.

TIP:

1. Name the Sewing Tools

- Show real sewing tools (needle, thread, tailor's chalk, tape measure, thimble, pin cushion) or large picture flashcards of each tool.
- Ask learners to say the names of each tool.

2. Matching Game

- Place the actual sewing tools (or flashcards) on a table.
- Say a tool's name and have a learner come forward and pick the correct tool.
- Repeat until all learners get a turn.

3. Picture Colouring

- Give each learner a worksheet with pictures of small needlework tools.
- Ask learners to color the pictures while you move around, asking: "What is this tool called?" Encourage them to say the name aloud.

Note: Use **real tools** or **big pictures** for easy recognition.

ACTIVITY 2: Drawing Small Needlework Tools

- Learners draw small needle work tools (tailors chalk, tape measures, thimble...)

TIP:

- Provide learners with paper and pencils.
- Guide them to draw and color small needlework tools.
- Display their drawings on the classroom wall.
- Encourage creativity - learners can color the tools afterward if time allows.

ACTIVITY 3: Using Small Needlework Tools

Task 1. Hands-on Practice

Learners to demonstrate how to use small needlework tools: Tape Measure, Tailor's Chalk , Thimble, Pin Cushion, Threading a Needle

TIP:

- *Using the Tape Measure* – Learners take turns measuring simple objects like their hands or a piece of fabric
- *Using Tailor's Chalk* – Each child marks a line or a shape on fabric.
- *Using the Thimble* – Show how to wear it on the finger for protection.
- *Using the Pin Cushion* – Learner's place pins into the pin cushion and remove them carefully.
- *Threading a Needle (Optional for Advanced Learners)* – With teacher guidance, demonstrate how to put thread through a needle's eye.

Task 2: Simple Sewing Tasks

- Learners to make a simple running stitch or just poke the needle through the fabric for practice.

TIP:

- Provide each learner with a small piece of fabric and a threaded needle (with supervision).
- Guide them to make a simple running stitch or just poke the needle through the fabric for practice.
- Help them place pins in fabric to hold pieces together before sewing.

ACTIVITY 4: Storing Small Needlework Tools

Task 1: learner Practice Sorting (Sorting Game)

- Learners pick tools and place it in the correct storage compartment.

TIP:

- Display all the needlework tools on a table or mat.
- Call learners one by one to pick a tool and place it in the correct storage compartment.
- Encourage them to say the tool's name aloud.
- Ask questions like *"Where should we keep needles?"* (Answer: In a needle case).

Task 2: Learner Practice storing

- **Learners practice storing** the tool using real or toy tools and a storage container (or picture cut-outs).
- Learners in small groups, work organize tools correctly.

TIP:

- **Begin by** asking questions like:
 - "What do you think will happen if we leave pins or needles on the floor?"
 - "Where do we keep tools after sewing?"
- Talk briefly about why proper storage is important (safety, avoiding loss or injury, keeping tools clean and ready to use).
- Demonstrate to learners how each tool should be stored:
 - **Needles and pins** go into a **pin cushion or needle case**.
 - **Thread** goes into a small box or sewing basket.
 - **Scissors** should be kept in a covered container or a safe section of the box.
 - **Tape measures** should be rolled neatly and stored in a drawer or box
- **Hands-on Practice**
 - Give learners a small box, pouch, or plastic container.
 - Let them **arrange tools neatly** inside it.
 - Label compartments together ("Pins," "Needles," "Thread"...).

TIP:

- Needlework tools are used for measuring, marking, sewing, and protecting fingers.
- Common tools include tailor's chalk, tape measure, thimble, and pin cushion.
- Proper storage keeps tools safe and easy to find.

Expected Standard: Small needlework tools are named, used, and stored correctly.

ASSESSMENT CRITERIA

Assess the ability to:

- Identify and name tools,
- understand functions of tools and safety practices.
- use needlework tools (measuring, marking, sewing), threading a needle,
- sort and store tools
- practice safety, responsibility, cleanliness, teamwork, and care for tools

SUMMARY

Needlework tools are essential for sewing and creating small fabric items. These tools serve different purposes: some are used for measuring, others for marking fabric, and some protect our fingers while sewing. Knowing how to use and store these tools properly helps us sew more effectively and safely. By practicing with these tools, learners develop important skills in sewing and tool care, making them more confident and responsible in their work

1.15 GRAPHIC COMMUNICATION

INTRODUCTION

The term graphic refers to the visual, or things we can see and communication refers to exchange of information in any form. Graphic communication is the process of conveying ideas and information through visual images, symbols and designs. It involves the use of drawings, diagrams and other graphic tools to communicate messages clearly and effectively.

General Competence(s)

Learners will acquire the following general competence(s):

- **Communication:** - Use appropriate language (verbal and non-verbal) in different situations
- Express oneself using different media and symbols
- **Critical thinking:** - Manipulate different objects
- Organise things according to their attributes
- **Problem solving:** - Solve problems within the context using oral, written, symbolic, graphical and numerical materials

KEY TERMS:

- **Line:** a thin mark on the surface of something
- **Graphic:** refers to the visual, or things we can see
- **Communication:** refers to exchange of information in any form

Sub-Topic: 1.15.1 Lines

Introduction:

Lines are instrumental in coming up with different design on paper or on electronic gadget. Different lines carry different meaning in profile design. Through lines technocrats are able to interpret data and communicate effectively. This topic will focus on drawing of different lines.

Specific Competence: 1.15.1.1 Draw different types of lines.

Learning environment: Indoor or Outdoor (Natural/Artificial/Technological)

Teaching and learning materials:

- White paper
- Crayons, markers, or colored pencils
- Rulers (optional)
- Template
- Chart or poster with examples of different lines
- Drawing examples (like a simple house with a straight line roof, a snake with wavy lines, etc.)

LEARNING ACTIVITY

ACTIVITY 1 Identifying different types of lines

Task 1: line identification

- Learners to identify different lines (straight line, zig-zag, wavy, curve...)

TIP:

- Start with a brief discussion about lines. Ask the pupils questions: “what do you think a line is?”
- Allow learners to draw different line on the board
- Show a chart or poster with examples of different lines :(Straight line, Horizontal, vertical, curved line Zigzag Wavy line dotted line...)

Task 2: Line matching

- Learners to match lines to their correct names

TIP:

- Point to different lines on the chart and ask pupils to name them
- Engage learners in matching name of lines to their correct visual representation

ACTIVITY 2: Drawing different types of lines using free hand

Task 1: Free hand line practice

- Learners to draw different types of lines using free hand

TIP:

- Demonstrate drawing of each type of line on the board using freehand, explaining how to draw them and where they might be used (road for straight lines, a snake for wavy lines...).
- **Guided Practice:** Step-by-Step Drawing: Ask the learners to practice drawing the different types of lines in their books or on paper using freehand. Provide verbal cues as they draw:
 - “Can you draw a straight line from left to right?”
 - “Now try drawing a wavy line, like the ocean.”
 - “How about a zigzag line, like the zigzag in the mountains?”
 - Walk around the classroom and offer help as needed. Encourage learners to use different colours for each type of line to make it visually engaging.

ACTIVITY 3: Drawing different types of lines using instruments

Task: Drawing lines

- Learners to draw different types of lines using instruments

TIPS:

- Demonstrate proper use of drawing instruments
 - Start with tracing tasks to help learners understand movement and alignment.
 - Show learners how to place the ruler flat on the paper and hold it steady with one hand.
 - Slowly draw a line with one hand, narrating the steps (Hold the ruler with one hand... draw along the edge)
 - Give hands on practice, let learner practice with real rulers in pairs or small groups.
 - Remind learners that neatness matters than speed
 - Praise carefully drawn lines even if they not perfect

Expected Standard: Different types of lines drawn accordingly.

ASSESSMENT CRITERIA:

- Assess Learners' ability to:
 - recognize and name different types of lines.
 - associate line types with their correct names
 - draw different types of lines freely and creatively.
 - use instruments correctly to draw precise lines.
- Assess accuracy and variety in lines drawn on the board (do they include straight, zigzag, wavy?).

SUMMARY

Lines play an important role in creating and understanding designs, whether on paper or electronic devices. Each type of line has its own meaning and can be used to express different ideas in profile designs. By learning how to draw and identify different lines, learners develop the ability to communicate visually and interpret design data effectively.

TOPIC: 1.16 CRAFTS

INTRODUCTION

Crafts are creative and fun activities that help children use their hands to make different things. In this topic, Learners will learn about two exciting types of crafts: **Paper Crafts** and **Modeling**.

In **Paper Crafts**, learners will explore how to make different items using paper, such as chains, belts, houses, masks, cars, and even a national flag. They will also learn how to make colourful pictures using the collage technique, where we stick different pieces of paper together to create beautiful designs. In **Modeling**, learners will use clay or plasticine to shape objects like animals, dolls, fruits, and birds. This will help learners improve creativity and make fun things with their hands.

General Competence(s)

Learners will acquire the following general competence(s):

- **Communication:** - Express oneself using different crafts
- **Critical thinking:** - Manipulate different objects
- Organise things according to their attributes
- **Problem solving:** - Solve problems within the context using crafts
- **Citizenship:** - Appreciate the use of different materials in craft-making
- **Creativity and innovation** - Create pictures using the collage technique.
- Creating items using paper.
- Model free-form objects using clay or plasticine.

KEY TERMS:

- **Craft:** Making things by hand.
- **Paper Craft:** Creating items using paper.
- **Chain:** A series of connected loops made from paper.
- **Mask:** A face covering used for decoration or fun.
- **Model:** A small copy of something (e.g., house, car, train).
- **Collage:** A picture made by sticking different materials together.
- **Texture:** The feel or look of a surface.
- **Layering:** Placing pieces on top of each other.
- **Modeling:** Shaping or forming objects using clay or plasticine.
- **Clay:** A soft, natural material used for molding.
- **Plasticine:** A soft, colorful material for modeling.

Sub-topic: 1.16.1 Paper Crafts

Introduction:

Paper can be used to make many useful and decorative items. This topic will help learners explore different paper craft techniques by creating items such as chains, belts, masks, and simple models. **Collage**, an art technique where pictures are created by sticking different materials like paper, cloth, or leaves onto a surface. Using a variety of papers, learners will design own unique collage pictures. This will help learners' express creativity while improving cutting, folding, and design skills.

Specific Competence: 1.16.1.1 Make Items Using Paper

Learning environment: Indoor or Outdoor (Natural/Artificial/Technological)

Teaching and learning materials:

- Coloured paper
- Old magazines or newspapers
- Glue
- Scissors
- Pencils and markers
- Clay or plasticine
- Modeling tools (optional)

LEARNING ACTIVITIES:

ACTIVITY 1: Identifying Items Made in Paper Craft

Task: Name and describe each item

- Learners name and describe examples of paper craft items.

TIP:

- Briefly explain that paper craft involves creating decorative or functional items using different types of paper and folding, cutting, gluing, or molding techniques
- Show learners various paper craft items. These can include: *Greeting cards, Origami figures, Paper flowers, Paper baskets, Paper beads, Wall decorations, Paper fans, Envelopes, Gift boxes.*

Ask learners to:

- Name each item.
- Discuss what the item could be used for.
- Identify the type of paper that may have been used.

ACTIVITY 2: Making Various Items Using Paper

Task: Making Items Using Paper

- Learners choose one or more items to make such as (Greeting card, Paper flower, Paper fan, Paper chain, Simple origami (boat, hat, bird), Paper bead bracelet or necklace...)
- Learners display their items on a table, mat or classroom wall and describe the items made.

TIP:

- Recap Activity 1 briefly (what paper craft is and examples of items).
- Show simple examples of paper crafts (a greeting card, a flower, a paper fan, or a small gift box...).
- Demonstrate step-by-step how to make the item(s).
- Use clear instructions and model each step (cutting, folding, gluing, decorating)

Demonstration

- Guide Learners as they:
 - Select their paper and materials
 - Follow steps to make their items
 - Decorate or personalize their items
- Let learners display their items on a table, mat or classroom wall.
- Invite each learner or group to briefly explain what they made.

Expected Standard: Items made using paper accordingly

ASSESSMENT CRITERIA:

- Assess ability to identify paper craft items from pictures.
- Assess ability to make at least one item using paper.
- Assess the practice of making their own paper items.

Specific competence: 1.16.1.2 Make different Pictures using the Collage technique.

LEARNING ACTIVITIES:

Activity: Make different pictures using collage technique

- Learners cut out shapes from old magazines, coloured paper, or newspapers.
- Learners Glue the pieces onto a larger sheet to form a picture.
- Learners add details by layering and arranging pieces creatively.

TIP:

Explain what a collage is: “A collage is a form of art where you create pictures by sticking materials such as paper, cloth, or natural objects onto a surface.”

- Show sample collages (real or pictures) to inspire learners.
- Briefly explain the process they’ll follow: sketch → tear or cut paper → glue → finish details.

Planning the Picture

- Ask learners to think of a simple picture to create (flower, animal, house, sunset, tree, person...).
- Let learners lightly sketch the outline of their picture on a plain paper or cardboard.

Creating the Collage

- Learners cut or tear paper into pieces of different shapes, sizes, and colors.
- Guide them as they:
 - Arrange paper pieces on the sketch.
 - Paste each piece carefully within the right areas.
 - Fill the whole picture space to make it neat and complete.
- Encourage creativity - papers can be layered or overlapped for texture.

Expected Standard: Different pictures using collage technique made appropriately.

ASSESSMENT CRITERIA

- Assess learners’ ability to:
 - use different materials and arrange them creatively.
 - demonstrate originality and personal style in their artwork.
 - express ideas visually through collage.
 - Demonstrate the use of colour, texture, shape, and composition creatively.

Sub-Topic: 1.16.2 Modeling

Introduction:

Modeling is a fun, hands-on way for learners to create objects using clay or plasticine. By shaping animals, dolls, fruits, and birds, learners strengthen their creativity, finger strength, and imagination.

Specific Competence: 1.16.2.1 Model objects using clay

Learning Environment: Indoor or Outdoor (natural and Artificial)

Teaching and Learning Materials:

- Clay or plasticine (various colours)

- Modeling tools (popsicle sticks, toothpicks)
- Pictures of animals, birds, fruits, dolls
- Display trays or tables

LEARNING ACTIVITY

Activity: Free-form Clay Modeling

Task: Object Creation

- Learners to model free form objects (animals, birds, fruits, dolls...)

TIP:

- Show pictures or real examples of objects to be modeled.
- Demonstrate rolling, flattening, and shaping clay/ plasticine into basic forms.
- Let learners choose what to make, encouraging their own ideas.
- Provide help as needed and allow peer sharing.
- Arrange completed models for a class display or gallery.

Expected Standard: Objects modelled using clay/ plasticine accordingly.

ASSESSMENT CRITERIA:

- Assess ability to:
 - Mold clay into identifiable objects with basic form and balance.
 - Demonstrate creativity and safe handling of tools and materials.

SUMMARY

In this topic, learners explore crafts through paper and modeling activities. They create decorative items, collage pictures, and molded figures using hands-on methods. These activities help learners develop creativity, coordination, and appreciation of handmade work. Through playful learning, they also build problem-solving and communication skills while having fun.

TOPIC: 1.17 LETTERING

INTRODUCTION

Lettering is the art of drawing or designing letters in a creative way. In this topic, learners will explore how letters of the alphabet can be formed and decorated using different methods such as drawing, colouring, cutting, and pasting. Lettering helps learners to develop fine motor skills, express creativity, and communicate visually. It also lays the foundation for early writing skills and understanding of alphabetic symbols.

General Competence(S):

Learners should: Acquire the following General Competence(s):

Critical thinking:	Create new patterns and shapes
Creativity and innovation:	Apply a set of skills that are appropriate for the creative process Establish relationship, patterns and make connections
Communication:	Express oneself using different media and symbols
Problem solving:	Solve problems within the context using oral, written, symbolic, graphical and numerical materials

KEY TERMS:

- **Letter:** A symbol used to represent a sound in a language (A, B, C...).
- **Lettering:** Drawing or designing letters in a decorative way.
- **Alphabet:** A set of letters arranged in a fixed order used in a language.
- **Copying:** Making a letter by tracing or drawing it the same way.
- **Cut-out:** A letter shape created by cutting from paper or card.
- **Design:** A creative plan or arrangement to make something look nice.
- **Paint:** To apply color to a surface using a brush or fingers.
- **Decorate:** To make something more attractive by adding colors, shapes, or patterns.

Sub-Topic: 1.17.1 Letters of the Alphabet

Introduction

Designing letters of the alphabet allows learners to explore creative ways of making and decorating letter forms. By engaging in hands-on activities like copying, cutting out, and painting, learners enhance their understanding of the alphabet while expressing themselves artistically. These activities help in developing both literacy and motor coordination skills.

Specific Competence:

1.17.1.1 Design letters of the Alphabet

Learning environment: Indoor or Outdoor (Natural/Artificial/Technological)

Suggested teaching and learning materials:

- Alphabet charts or flashcards
- White paper or drawing books
- Crayons, markers, or colored pencils
- Safety scissors and glue sticks
- Pre-cut letter stencils or templates
- Cardboard or colored construction paper
- Paints and brushes
- Posters with creatively designed letters

LEARNING ACTIVITY

ACTIVITY 1 : Designing letters of the alphabet (copy, cut out, paint letters ...)

Task 1: Guided Letter Copying

- Learners recognize and reproduce letters by copying.

TIP:

- Display an alphabet chart and point to each letter while naming it.
- Write a few selected letters on the board and model how to copy them.
- Provide learners with dotted-line letter worksheets for tracing. (optional)
- Move around the classroom offering individual support as learners copy letters into their exercise books.

Task 2: Letter Decoration Challenge

- Learners to design letters by decorating them creatively.

TIP:

- Distribute printed outlines of *uppercase* and *lowercase* letters.
- Demonstrate decorating one letter with different patterns (stripes, dots, spirals...).
- Ask learners to choose one letter (the first letter of their name) and decorate it using crayons, markers, or colored pencils.
- Display some decorated letters on the board or a “Letter Art Wall.”

Task 3: Letter Painting

- Learners to paint letters to develop fine motor skills and color recognition.

TIP:

- Demonstrate painting a large printed letter using finger paints or a brush.
- Guide learners as they use paint to fill in printed letters or create their own on blank paper.
- Encourage learners to use different colours for different parts of the letter.
- Allow time for drying and display their painted letters in class.

Task 4: Cut-and-Paste Letter Collage

- Learners to use cutting and pasting to form or decorate letters.

TIP:

- Pre-draw or print large letters for cutting practice.
- Demonstrate safe scissor use and how to glue letters onto a coloured background.
- Let learners decorate around their cut-out letters with stickers, shapes, or magazine cuttings.
- Help learners paste letters together to form their names or familiar words like (“MOM,” “DOG” ...).

Expected standard: Letters of the alphabet designed accordingly

ASSESSMENT CRITERIA:

- Assess learners’ ability to:
 - Recognize and name the letter
 - Copied letters, clearly shaped and proportional
 - Use creative decoration techniques
 - Cut and paste letters

SUMMARY

In this topic, learners are introduced to **lettering** - the creative art of designing and decorating letters of the alphabet. Through engaging, hands-on activities such as copying, decorating, cutting, and painting, learners explore various ways of forming letters using different materials and tools. These practical experiences help learners develop **fine motor skills**, enhance their **creativity**, improve **letter recognition**, and strengthen **early writing abilities**.

TOPIC: 1.18 SWIMMING

INTRODUCTION

Swimming is a fun and important physical activity that helps learners develop strength, coordination, and confidence in water. In addition to learning how to swim, it is essential for learners to understand and follow hygiene rules to keep themselves and others safe and healthy in the swimming pool. This topic focuses on teaching the basic rules of pool hygiene in a fun, interactive, and age-appropriate way.

General Competence(s)

Learners should acquire the following General Competence(s):

- **Creativity and innovation:** - Apply a set of skills that are appropriate for the creative process.
- **Environmental sustainability:** - Care for the environment and natural resources
- **Citizenship:** - Show empathy, honesty and support to others
- Respect other people's property
- Show responsibility to one's actions
- Practise environmental sustainability

KEY TERMS:

- **Hygiene:** Keeping yourself and your environment clean to stay healthy.
- **Pool:** A place filled with water where people swim.
- **Shower:** Washing the body with water before entering the pool.
- **Clean:** Free from dirt or germs.
- **Germs:** Tiny organisms that can make people sick.
- **Toilet:** A place to urinate or defecate before swimming.
- **Rules:** Guidelines we follow to stay safe and healthy.

Sub-Topic 1.18.1 Pool Hygiene

Introduction

Pool hygiene is important to keep the swimming pool clean and safe for everyone. Learners will explore basic hygiene rules such as taking a shower before entering the pool, using the toilet before swimming, and not urinating in the pool. Through demonstrations and role-play, learners will understand why hygiene matters and how to practice it.

Specific Competence(s):

1.18.1.1 Demonstrate rules on pool hygiene.

Learning Environment: Indoor or outdoor (preferably near a pool or simulated setup)
Natural/Artificial/Technological.

Teaching and Learning Materials:

- Pictures or charts showing clean and dirty pools.
- Flashcards with hygiene rules.
- Water spray bottles for handwashing demonstrations.
- Storybooks or short videos on pool hygiene.
- Cut-out images for sorting activities (clean vs. unclean behaviors).
- Toy shower or wash station setup
- Role-play props (e.g., towels, swimming costumes, flip-flops)
- Music or rhymes about pool rules

LEARNING ACTIVITIES:

ACTIVITY 1: Demonstrating basic rules on pool hygiene

Task 1: Discussion and Visual Presentation

- Learners to identify and discuss hygiene actions before swimming.

TIP:

- Begin with a question: “What should we do before we swim?” like ‘Taking a shower’
- Show picture cards of showering, using the toilet, and wearing clean swimwear.
- Use a story or rhyme to illustrate a child getting ready to swim properly.

Task 2: Role-Play Routine

Learners act out steps to follow pool hygiene.

TIP:

- Set up a “pretend” pool area in the class.
- Demonstrate actions: walking to the shower, washing, drying off, using the toilet.
- Invite learners in small groups to practice the routine.
- Reinforce language: “I take a shower,” “I go to the toilet,” “I don’t pee in the pool.”

Task 3: Hygiene Song or Chant

- Learners to sing or recite a simple hygiene song or rhyme.

TIP:

- Teach a short rhyme:
“Shower first, keep it clean,
Don’t pee in the pool—it’s mean!”

*Go to the toilet, wash your hands,
Then you're ready to splash and stand!"*

- Add simple movements to the rhyme for fun and memory.

Expected Standard: Rules on pool hygiene demonstrated correctly.

ASSESSMENT CRITERIA:

- Assess learners' ability to:
 - name and demonstrate pool hygiene steps
 - recognise good hygiene habits
 - participate in role-play and discussion
 - expression verbal hygiene rules through songs or chants.

SUMMARY

In this topic, learners are introduced to the importance of **pool hygiene** as part of swimming activities. Through visual aids, role-play, and fun games, they learn how to shower before swimming, use the toilet, and avoid unhygienic practices. These simple but vital actions help keep the swimming environment clean and healthy, while also fostering responsibility, awareness, and social skills.

TOPIC: 1.19 STRUCTURES

INTRODUCTION

Structures are objects or things that are made up of parts put together to serve a purpose. They can be found in both the natural and built environments. In this topic, learners will observe and identify different types of structures such as houses, bridges, eggs, bicycles, and cars. By exploring structures around them, learners begin to understand how these things are made and how they help people in daily life.

General Competence(s)

Learners should acquire the following General Competence(s):

- **Critical thinking:** - learners will be able to evaluate solutions
- **Creativity and innovation:** - Apply a set of skills that are appropriate for the creative process.
- Use imagination and creativity to solve problems.
- **Critical thinking:** - Manipulate different objects

KEY TERMS:

- **Structure:** Anything made of parts put together in a specific way to serve a purpose.
- **Natural structure:** A structure made by nature (egg, tree, nest...).
- **Man-made structure:** A structure made by people (house, bridge, bicycle...).
- **Bridge:** A structure built to allow people or vehicles to cross over something.
- **House:** A building where people live.
- **Bicycle:** A vehicle with two wheels used for transport.
- **Car:** A vehicle used for transporting people or goods.
- **Egg:** A natural structure that holds a developing bird or reptile.

Sub-Topic 1.19.1 Types of Structures

Introduction

Learners will be introduced to various structures by observing and classifying them into natural and man-made (artificial). Through exploration, drawing, and hands-on classification activities, they will develop an understanding of how structures differ and what makes each one unique.

Specific Competence:

1.19.1.1 Identify types of structures

Learning Environment: Indoor or Outdoor (Natural/Artificial/Technological)

Teaching and Learning Materials:

- Picture flashcards of different structures (house, car, bridge, egg, bicycle...)
- Real or toy models (toy cars, plastic eggs, toy houses...)
- Building blocks or construction toys
- Drawing paper and crayons
- Posters showing natural and artificial structures
- Storybooks featuring various structures
- Nature walks checklist or observation sheets

LEARNING ACTIVITY:

ACTIVITY 1: Identifying types of structures

Task 1: Structure Picture Matching

- Learners match pictures of structures to their names.

TIP:

- Display flashcards with different structures and their names.
- Discuss each structure and ask learners what they are used for.
- Help learners match name cards to the correct images.
- Group structures as natural or man-made using a chart or board.

Task 2: Structure Walk (Indoor or Outdoor)

- Learners observe and identify structures in their environment.

TIP:

- Take a walk around the school or playground.
- Point out and name structures (classroom, tree, bridge, slide...).
- Provide a checklist with images of structures to tick off during the walk.
- Discuss what each structure is for and how it might have been built.

Task 3: Drawing and Classifying Structures

- Learners draw examples of structures they have seen.

TIP:

- Ask learners to draw two structures: one natural and one man-made.
- Let them describe their drawings in front of the class or in small groups.
- Display their work on a class "Structure Wall."

Expected Standard: Types of structures identified correctly

ASSESSMENT CRITERIA:

- Assess learners' ability to:
 - recognize and name various types of structures
 - classify structures as natural or man-made
 - Participate in activities such as drawing very basic structures
 - communication when describing structures.

SUMMARY

In this topic, learners are introduced to the world of **structures**. By observing, identifying, and creating different types of structures, they learn to distinguish between natural and man-made objects. These engaging activities build learners' critical thinking, observation, and communication skills, while also sparking curiosity about how things are built and how they work in everyday life.

TOPIC: 1.20 ENTREPRENEURSHIP

INTRODUCTION

Entrepreneurship is the act of creating and managing a business to make goods or provide services for the community. In this topic, learners will be introduced to the concept of an entrepreneur and the important role they play in society. By identifying local entrepreneurs and participating in activities such as role playing, learners begin to understand how goods and services are made, bought, and sold, and how these contribute to everyday life.

General Competence(s):

Learners should acquire the following General Competence(s):

- **Communication:** - Express oneself using different media and symbols.
- **Critical thinking:** - Organize things according to their attributes.
- Manipulate different objects.
- **Entrepreneurship:** - Demonstrate fundamental knowledge of what entrepreneurship is.
- Manage finances through saving and spending
- Understand sources of income

Hook:

*“Have you ever bought bread from a shop or taken a ride in a taxi? The people who run these businesses are called **entrepreneurs**. Today, we’ll learn how they help our community by making, selling, and providing services!”*

KEY TERMS:

- **Entrepreneur:** A person who starts and runs a business to make or sell goods or provide services.
- **Goods:** Items that are made or sold, like clothes or food.
- **Services:** Helpful actions provided by people, like cutting hair or transporting people.
- **Shopkeeper:** A person who owns or runs a shop.
- **Market trader:** A person who sells things at a market.
- **Transporter:** A person who helps people or goods move from one place to another.
- **Selling:** Giving something in exchange for money.
- **Buying:** Getting something by paying money.

Sub-Topic : 1.20.1 Entrepreneur

Introduction:

Learners explore what it means to be an entrepreneur by observing and talking about familiar community workers. Through discussions, storytelling, and dramatization, they begin to appreciate how entrepreneurs contribute to the wellbeing of the society by selling useful goods and offering important services.

Specific Competence(s):

1.20.1.1 Demonstrate knowledge on the roles of an entrepreneur

Learning Environment: Indoor or Outdoor (Natural/Artificial/Technological)

Teaching and Learning Materials:

- Picture flashcards or posters showing various community entrepreneurs
- Role play items (toy money, toy goods, aprons, boxes, baskets)
- Drawing paper and crayons
- Storybooks or audio stories about local businesses
- Real-life examples (invitations to local entrepreneurs for classroom visits)
- Market or shop setup using classroom furniture

LEARNING ACTIVITY

Task 1: Community Entrepreneur Discovery

- Learners to identify different types of entrepreneurs in their environment.

TIP:

- Show pictures of local entrepreneurs (shopkeeper, tailor, driver, hairdresser...).
- Discuss what each person does and where they work.
- Ask learners to share if they know anyone who owns a shop, sells at the market, or drives a taxi.
- Create a community chart with pictures or drawings of these entrepreneurs.

Task 2: Roles of entrepreneurs

- Learners to discuss the roles and importance of entrepreneurs

TIP:

- Read or tell a story about a local business person.
- Ask questions like: “What did the entrepreneur sell or make?” “How did they help the community?”
- Write or draw the answers together on the board (“Makes clothes,” “Sells food,” “Drives people” ...).
- Introduce terms like goods and services and give examples.

Task 3: Role Play – I Am an entrepreneur

- Learners to act out buying and selling scenarios.

**TIP:**

- Set up a classroom “market” or “shop” with toy money and goods.
- Assign roles: shopkeeper, customer, driver, etc.
- Guide learners to practice simple dialogues:
- Switch roles and let everyone have a turn.

Expected Standard: Knowledge on the roles of an entrepreneur demonstrated correctly.

**ASSESSMENT CRITERIA:**

- Assess learners’ ability to:
 - recognize and name different types of entrepreneurs
 - describe goods and services provided
 - participate actively in role play and classroom market
 - communicates ideas clearly through drawing and storytelling

**SUMMARY**

In this topic, learners are introduced to **entrepreneurship** and the important role entrepreneurs play in the community. Through activities like identifying local businesses, discussing what entrepreneurs do, and participating in fun role play and drawing tasks, learners develop an understanding of how goods and services are produced and provided. These learning experiences support critical thinking, communication, and appreciation of work in the community.

SAMPLE LESSON PLAN

SCHOOL: Lukanga Primary

NAME OF TEACHER: Bwalya Banda Lubasi

DATE: 05/05/2025

CLASS: 1 B

TIME: 07:30 – 08:00

TOTAL ENROLMENT: BOY: 25 GIRLS: 20

DURATION: 30 Min

TOTAL ATTENDANCE: BOYS: 23 GIRLS: 19

SUBJECT: Creative Technology Studies CTS

TOPIC: 1.6 Sounds

SUB-TOPIC: 1.6.1 Exploration of sounds

GENERAL COMPETENCES:

- i. Critical thinking
- ii. Creativity and innovation

SPECIFIC COMPETENCES: 1.6.1.1 Produce different Sounds

RATIONALE:

This lesson will focus on exploring sounds, particularly discovering and learning how different sounds are made, what causes them, and how they can be used to express ideas. Through brainstorming, exploration, and experimenting, learners will sharpen their listening skills and enhance creative thinking.

PRIOR KNOWLEDGE:

Learners may have heard and imitated different sounds in their immediate environment.

REFERENCES:

Zambia Primary School Creative Technology Studies Curriculum, Teacher's Guide and Learner's Book Grade 1. *Page: 2-3*

LEARNING ENVIRONMENT:

- Natural environment (outdoor sounds),
- Artificial environment (classroom, man-made instruments),
- Technological environment (recorded sounds if available)

TEACHING AND LEARNING MATERIALS/RESOURCES:

- Plastic bottles, tins, sticks, stones
- Flashcards of sound sources
- Local instruments (drums, shakers)

EXPECTED STANDARD: Different sounds produced accordingly.

LESSON PROGRESSION:

STAGES	TEACHER'S ACTIVITY	LEARNERS' ACTIVITY	ASSESSMENT CRITERIA
INTRODUCTION 5min	Ask learners “<i>What sounds can you hear right now in the classroom or outside?</i>” or ask learners if they can name any sounds they have heard at home or outside.	Brainstorming and responding with examples (dog barking, car, clapping, wind...).	Observe learner engagement and participation
LESSON DEVELOPMENT 15min	Sound Scavenger Hunt Guide learners outside or near windows to listen to different sounds. Ask them to imitate what they hear.	Activity: Producing different Sounds <i>Task 1: Sound Scavenger Hunt</i> Learners listen to sounds, imitate them, and say whether they are natural or artificial.	Assess the Ability to identify and imitate sounds.
	Sound Creation - Divide learners into small groups. Provide each group with different items (<i>sticks, empty tins and bottle...</i>). - Guide learners to produce unique sounds using items provided and body parts (<i>hands, mouth, fingers</i>) and present to the class. Note: Explain the concept (refer to notes)	<i>Task 2: Sound Creation</i> In groups, learners to create and present their own sounds using materials/items or body parts.	Assess the ability to use items and body parts (<i>hands, mouth, fingers</i>) to produce different sounds.
EXERCISE / APPLICATION 5min	- Call out or make a familiar sound (<i>clapping, hissing, tapping, bird sound...</i>). - Ask each learner to use items and body parts (<i>hands, mouth, or fingers...</i>) to create one unique sound.	- Repeating (imitating) the sound using their voice or body. - Using their hands, mouth, or fingers to create one unique sound. - Playing or making different sounds using classroom materials (<i>tapping a desk, shaking a bottle with stones, or drumming...</i>).	Assess the Ability to produce their own sounds

CONCLUSION 5min	Summarising key learning points: • Sound is created by vibration. • We can hear and make sounds using our body or objects around us. • Sounds can be natural or artificial.	• Listening attentively and ask questions or make comments.	• Evaluate learners' understanding of sounds and their application in real world situations. • Suggest areas of improvement.
--------------------------------------	---	---	---

HOMEWORK:

- At home, listen to at least three sounds and draw items used to produce that particular sound (bird chirping, someone clapping, a car honking...).

Note: Learners complete the task with help from parents/guardians.

LESSON EVALUATION:

Learners were able to identify, imitate, and create different sounds using available materials and body parts. Participation was active during group presentations. Some learners needed support differentiating between natural and artificial sounds, which will be reviewed in future lessons.
