PREFACE

The advent of the Competence-Based Curriculum (CBC) heralds a new era of dynamic and practical learning experiences designed to equip learners with the 21st century skills. It marks a trans-formative step in improving education quality and relevance.

The **French Language Teaching Module** has been designed in line with the Competence Based Education principles which seek to link education to real life experiences. The General Competences provided in the 2023 Zambia Curriculum Framework are linked to the content of this module.

The module aims to support French teachers in the implementation of the Competence Based Curriculum in the absence of approved text books. It therefore reflects the Ministry's unwavering commitment to making this journey as smooth as possible for teachers. However, teachers are encouraged to supplement this module with their own research and innovations in order to address any gaps that may arise during implementation.

I hope teachers will make good use of this resource.

It explores physical attributes of a person such as height, weight, eye colour, complexion and personality traits such as kindness, honesty, patience, confidence. The topic will also deal with physical characteristics for a thing namely, size, shape, colour and material. The topic has two sub-topics namely Colours and Physical Characteristics and Personality.

General Competences

- ii. Express oneself clearly, effectively and take turns when conversing with others.

Emotional intelligence

- i. Learners express empathy for other people.
- ii. Learners will relate effectively with others as they discuss their different personalities.

Hook

Sub -Topic 1.6.1 Colours

Introduction

This sub topic focuses on colours. Colours are one of the first vocabulary sets learners learn. They are easy to visualize and use in everyday life, making them a great starting point for language learning. Knowing colours helps learners to describe objects, clothes, food and the world around them. This enhances the ability to speak and understand French in real life situations. Learning about colours will also enable learners to understand the agreement in gender and number, an essential part of French grammar.

Specific Competence 1.6.1.1: Express preferences for colours in French.
