PREFACE

The advent of the Competence-Based Curriculum (CBC) heralds a new era of dynamic and practical learning experiences designed to equip learners with the 21st century skills. It marks a trans-formative step in improving education quality and relevance.

The Reading and Writing Module for Grade 1 has been designed in line with the Competence Based Education principles which seek to link education to real life experiences. The General Competences provided in the 2023 Zambia Curriculum Framework are linked to the content of this module.

The Module aims to support Grade 1 teachers in the implementation of the CBC in the absence of approved text books. It therefore reflects the Ministry's unwavering commitment to making this journey as smooth as possible for teachers. However, teachers are encouraged to supplement this module with their own research and innovations in order to address any gaps that may arise during implementation.

I hope teachers will make good use of this resource.

INTRODUCTION

The Lower Primary Literacy in English Teaching Module for Grade 1 has been developed to support teachers in the effective delivery of English Literacy and Language lessons under the reformed curriculum. The module is developed based on the approved 2024 Competence-based English language Syllabus. It aims to bridge the gap created by the absence of approved textbooks and to equip educators with practical tools, activities, and assessments tailored to the learners' level and needs.

The Ministry understands the challenges that come with transitioning to a new curriculum that is Competence Based. The choice of the Competence-Based Curriculum (CBC) marks a transformative step in improving education quality and relevance. This module reflects the Ministry's unwavering commitment to making this journey as smooth as possible for teachers, by providing structured guidance, suggested activities, and formative assessments that align with the CBC's objectives. However, teachers are encouraged to supplement this module with their own research and innovations in order to address any gaps that may arise during implementation.

The suggested activities and assessments provided in this module are designed to foster practical and critical thinking skills in learners while ensuring relevance and adaptability to different school contexts. Teachers are encouraged to tailor these pedagogical skills to their unique classroom dynamics and to explore alternative, acceptable approaches which are learner centred and translanguaging practices that support the multilingual teaching environment necessary in the Zambian classrooms. This flexibility is important to ensuring that all learners, regardless of their environment, benefit from meaningful and impactful Curriculum.

It is envisaged that this module will serve as a valuable resource for teachers as they navigate the new Competence-Based Curriculum, enhancing their ability to inspire and equip learners with

essential Language and Literacy knowledge, skills and positive attitudes desired to create a vibrant and responsive education system.

HOW THE MODULE SHOULD BE USED

This module is designed to support teachers in planning and delivering grade 1 reading and writing lessons for Term 3. It is organized into weeks covering several topics and sub-topics. Teachers are encouraged to design their own lessons using the suggested activities and supplementary resources.

SUGGESTED TEACHING METHODOLOGY

The reading and writing skills will be addressed within single lesson. Reading lessons will follow the Primary Literacy Programme (PLP), focusing on Phonemic Awareness, Phonics, Fluency, Vocabulary, and Comprehension. Additionally, integrated skills, such as Handwriting and Punctuation, will be emphasised during the writing part of a literacy lesson.
